|                                                                                                                                   |         |
|-----------------------------------------------------------------------------------------------------------------------------------|---------|
| Pair-wise continuity in soft bitopological ordered spaces<br>S. H. SHALIL, S. A. EL-SHEIKH, S. A. KANDIL                          | 205–221 |
| On $L$ -almost separation axioms in $L$ -fuzzifying bitopological spaces<br>HANA M. BINSHAHNAH, A. K. MOUSA                       | 223–232 |
| On the Diophantine equation $a \left( \frac{b^k-1}{b-1} \right) = U_n - U_m$<br>PAGDAME TIEBEKABE, AMADOU TALL, AND ISMAÏLA DIOUF | 233–244 |
| Generalization of fuzzy ideals of semirings and metatheorem<br>RAVI SRIVASTAVA, ARVIND                                            | 245–255 |
| Interval type-2 fuzzy linear programming problem with vagueness parameters<br>HASSAN MISHMAST NEHI, SHOKOUH SARGOLZAEI            | 257–284 |
| Some mixed neutrosophic sets<br>S. JAFARI, G. NORDO, N. RAJESH                                                                    | 285–296 |
| Cantor's and Baire's theorem in fuzzy soft 2-metric spaces<br>P. G. PATIL, RANI TELI                                              | 297–308 |
